

The Boat House is the perfect focal point while enjoying your boating experience on Blalock Lakes. A full service marina, the Boat House will offer docks with slips for resident's boats. In an effort to keep the natural look and feel of the lakes, only electric motors, not outboards, will be allowed. HighGrove Partners drew the overall master plan for the Boat House as seen below, created a 3-D image in Sketchup so that the client could get a better idea of how the Boat House would look, and provided photos to help support all the Boat House has to offer.
