

HighGrove Partners was hired by Cousins Properties to assist with landscape renovations and upgrades on the Crawford Long Hospital campus. The client's program required that the design be appealing and accommodate a large volume of pedestrian and vehicular traffic. The design needed to bring new vitality to the downtown area and provide relief from the urban backdrop. HighGrove designed and installed 8 phases of landscape improvements over a period of 2 years. As part of that work, a series of courtyards were designed. While each area is different in scale and orientation, there are common themes that repeat in each courtyard to provide continuity throughout the project. HighGrove also implemented street improvements around the perimeter of the campus.
