

# Private Office Building and Grounds

This private property comprises numerous unique spaces including two courtyards, a private garden and a highly focal entrance area.

HighGrove Partners designed and installed the landscape such that it would be both luxurious and eco-friendly. Xeriscape™ principles were adopted whereby plants are chosen based on the site, exposure, soil type and climate zone in order to conserve water and utilize fewer chemicals. HighGrove Partners has also been maintaining this prestigious office building and grounds since 2004.
