**HIGHGROVE PARTNERS LAUNCHES EARTH DAY COMMUNITY SERVICE
LANDSCAPE PROJECT AT CATHEDRAL OF CHRIST THE KING**

Austell, Georgia (May 6, 2010) - On April 22, 2010 (Earth Day), as part of the Professional Landcare Network's nationwide Day of Service (<http://planetdayofservice.org>), HighGrove Partners (<http://www.highgrove.net>) organized a volunteer landscape project at Cathedral of Christ the King (<http://www.cathedralofchristtheking.org>) and Christ the King School (<http://www.christking.org>) in Atlanta.

For the Community Service project, HighGrove Partners organized six landscape projects around the cathedral/school property with approximately 80 volunteers. Volunteers included cathedral staff members, students of the school and employees and clients of HighGrove Partners. The projects comprised a range of landscape work in various areas of the cathedral/school including planting various shrubs, flowers and trees; transplanting shrubs; installing irrigation; watering and applying pine straw.

At the conclusion of the day, the cathedral's pastor Reverend Frank McNamee said, "Thank you and all your people for a great day and your generosity to Christ the King. The Cathedral looks outstanding and we are very proud."

"The cathedral is a long time client and we are privileged to work with them on this project. This is our second annual Earth Day Community Service project and all of the volunteers did a marvelous job and had a lot of fun working together. This is a fantastic way to give back to our community while honoring the 40th anniversary of Earth Day," says Jim McCutcheon, Chief Executive Officer of HighGrove Partners.

About HighGrove Partners

Serving the needs of metropolitan Atlanta since 1989, HighGrove Partners provides a comprehensive range of landscape and land development services to office parks, commercial buildings, and institutional and community facilities. Services include landscape architecture, design-build, installation, land development services, maintenance, seasonal color, irrigation and water management.
